WHY A DOMAIN INSTEAD OF A WEBSITE?

“Domain” was chosen over “website” because it implies the possibility of several websites under one domain.

- Web Literacy
- Digital Identity
- Reclaim
- Advanced Pedagogical Designs

WHAT DOES IT LOOK LIKE?

- **cPanel:**
Fully functional Control Panel for those that like to dig into the code
- **Installatron:**
Quick installation of over 100 open source applications in cPanel – blogging, forums, wikis, CMS, etc, etc, etc.
- **One Click Installation:**
All apps in Installatron are easy and automatic to install, just click, enter some details, and get started.

SO WHAT DO YOU THINK?

What could this be used for?
